

Solmut (\$SLMT) Whitepaper

Solmut (\$SLMT) – The Ultimate Solana Dog, Racing to the Moon!

Version 1.1 – March 2025

1. Introduction

Cryptocurrency has evolved beyond just a financial asset—it has become a cultural movement driven by strong communities. **Solmut (\$SLMT)** is a Solana-powered meme token built for speed, scalability, and engagement. With lightning-fast transactions, ultra-low fees, and an auto-burn mechanism, Solmut (\$SLMT) is set to lead the next wave of meme tokens, combining fun with real utility on the Solana blockchain.

With a Solana-themed dog mascot, staking rewards, and an auto-burn mechanism, \$SLMT aims to become a dominant meme token in the Solana ecosystem while rewarding early adopters and long-term holders.

2. Why Solmut (\$SLMT)?

Solmut (\$SLMT) offers several advantages over traditional meme coins:

- Built on Solana – Faster and cheaper transactions
- Community-Driven – Governance and growth shaped by its holders.
- Auto-Burn Mechanism – A portion of transactions is burned, reducing supply over time.
- Staking Rewards – Holders can stake their tokens to earn passive income.
- Fair Tokenomics – A structured presale and vesting period ensure long-term sustainability.

3. Tokenomics

Category	Percentage	Amount (Tokens)	Locked/Unlocked	Description
Total Supply	100%	100,000,000	-	Total number of Solmut tokens available for distribution.
Presale	15%	15,000,000	✅ Unlocked	Tokens allocated for public sale. These tokens will be sold during a presale event.
Team/Development	20%	20,000,000	🔒 Locked	Tokens allocated for the project team, advisors, and developers. A vesting period may apply.
Liquidity Pool	10%	10,000,000	✅ Unlocked	Tokens allocated for liquidity on decentralized exchanges (DEX) to ensure smooth trading.
Staking/Rewards	10%	10,000,000	🔒 Locked	Tokens allocated for staking rewards and incentivizing holders.
Marketing & Partnerships	5%	5,000,000	✅ Unlocked	Tokens for marketing, promotions, influencer partnerships, and collaborations.
Reserve	25%	25,000,000	🔒 Locked	Tokens kept in reserve for future needs, such as future token burn, additional liquidity, or emergencies.
Staking Reserve	15%	15,000,000	🔒 Locked	Additional staking rewards to be unlocked over time.

Total Locked Tokens: 70,000,000 \$SLMT (70%)

Total Unlocked Tokens: 30,000,000 \$SLMT (30%)

Vesting & Unlock Conditions

To ensure long-term sustainability, 70% of the total supply is initially locked, with a controlled unlocking mechanism:

- ✓ **Maximum Unlock:** 5% of the total supply per unlock (5,000,000 tokens).
- ✓ **Minimum 6-Month Interval:** Unlocks can only occur once every 6 months.
- ✓ **Price Condition:** The price of \$SLMT must sustain 2× the last unlock price for 30 consecutive days before the next unlock occurs.
- ✓ **Flexibility:** The project team can delay or reduce unlocks but cannot exceed the limits.

4. Features and Utilities

4.1 Auto-Burn Mechanism

To maintain scarcity and increase long-term value, a small percentage of every transaction is burned, reducing the total supply over time.

4.2 Staking Rewards

Holders can stake \$SLMT to earn passive rewards in the form of additional tokens. The longer they stake, the more they earn.

4.3 Fast & Cheap Transactions

Unlike Ethereum-based meme tokens, \$SLMT benefits from Solana's sub-second finality and low transaction fees (~\$0.00025 per transaction).

4.4 Community Governance

As the project matures, governance proposals may allow \$SLMT holders to vote on key decisions, ensuring a decentralized and community-driven future.

5. Roadmap

Phase 1: Development & Launch

- ☒ Token Minted on Mainnet
- ☐ Website and whitepaper release
- ☒ Community building on Twitter, Telegram

Phase 2: Presale & Exchange Listings

- ☐ Solmut (\$SLMT) presale launch
- ☐ DEX listing on Raydium and Orca
- ☐ CEX negotiations for Tier 2 & Tier 3 exchanges

Phase 3: Growth & Expansion

- ☐ Staking platform launch
- ☐ First batch of burns from transaction fees
- ☐ Strategic partnerships with Solana projects

Phase 4: Long-Term Sustainability

- ☐ Community governance activation
- ☐ More exchange listings
- ☐ Continued token burns & staking rewards

6. Smart Contract & Security

- **Solana SPL Token Standard – Fully compliant with Solana's token framework.**
- **Audits – Will undergo independent smart contract audits before launch.**

7. Conclusion

Solmut (\$SLMT) is not just another meme coin. It's a fast, low-cost, and community-driven meme token built on Solana's powerful blockchain. By integrating staking, auto-burns, and fair tokenomics, \$SLMT has the potential to become a major player in the meme token space.
